

# SHV Series Reed Relays

- Features: Small Size High Voltage Relay, High Dielectric Strength up to 4 kVDC, Internal Magnetic Shield
- Applications: Portable Test and Medical Equipment, Defibrillators, Cable and In-Circuit Tester & Others
- Markets: Test and Measurement, Medical & Others

Part Description: **SHV 00-1A85-78X0K**

| Nominal Voltage | Contact QTY | Contact Form | Switch Model | Pin Out | Option | Breakdown Voltage |
|-----------------|-------------|--------------|--------------|---------|--------|-------------------|
| 05, 12          | 1           | A            | 85           | 78      | D, L   | 2K, 3K, 4K        |

| Customer Options   | Switch Model     | Unit |
|--|------------------|------|
| <b>Contact Data</b>  | <b>85</b>        |      |
| <b>Rated Power (max.)</b><br>Any DC combination of V&A not to exceed their individual max.'s | 100              | W    |
| <b>Switching Voltage (max.)</b><br>DC or peak AC   | 1,000            | V    |
| <b>Switching Current (max.)</b><br>DC or peak AC   | 1.0              | A    |
| <b>Carry Current (max.)</b><br>DC or peak AC   | 2.5              | A    |
| <b>Contact Resistance (max.)</b><br>@ 0.5V & 50mA  | 150              | mOhm |
| <b>Breakdown Voltage (min.)</b><br>According to EN60255-5                                    | 2 / 3 / 4        | kVDC |
| <b>Operating Time (max.)</b><br>Incl. Bounce; Measured with w/ Nominal Voltage               | 1.1              | ms   |
| <b>Release Time (max.)</b><br>Measured with no Coil Excitation                               | 0.1              | ms   |
| <b>Insulation Resistance (typ.)</b><br>Rh<45%, 100V Test Voltage                             | 10 <sup>10</sup> | Ohm  |
| <b>Capacitance (typ.)</b><br>@ 10kHz across open Switch                                      | 0.5              | pF   |

| Coil Data    |              | Coil Voltage (nom.) | Coil Resistance (typ.) | Pull-In Voltage (max.) | Drop-Out Voltage (min.) | Nominal Coil Power (typ.) |
|--------------|--------------|---------------------|------------------------|------------------------|-------------------------|---------------------------|
| Contact Form | Switch Model |                     |                        |                        |                         |                           |
| Unit         |              | VDC                 | Ohm                    | VDC                    | VDC                     | mW                        |
| 1A           | 85 (3kV)     | 05                  | 180                    | 3.75                   | 0.5                     | 139                       |
|              |              | 12                  | 500                    | 8.4                    | 1.8                     | 288                       |
|              | 85 (4kV)     | 05                  | 140                    | 3.75                   | 0.5                     | 179                       |
|              |              | 12                  | 500                    | 8.4                    | 1.8                     | 288                       |

The Pull-In / Drop-Out Voltage and Coil Resistance will change at rate of 0.4% per °C.

| Relay Data  |                  | Unit |
|---|------------------|------|
| <b>Dielectric Strength Coil/Contact (min.)</b><br>according to EN60255-5      | 4                | kVDC |
| <b>Insulation Resistance Coil/Contact (typ.)</b><br>Rh<45%, 200V Test Voltage | 10 <sup>12</sup> | Ohm  |
| <b>Capacitance Coil/Contact (typ.)</b><br>@ 10 kHz                            | 1.2              | pF   |
| <b>Shock Resistance (max.)</b><br>1/2 sine wave duration 11ms                 | 30               | g    |
| <b>Vibration Resistance (max.)</b>  | 20               | g    |
| <b>Operating Temperature</b>  | -40 to 100       | °C   |
| <b>Storage Temperature</b>  | -40 to 125       | °C   |
| <b>Soldering Temperature (max.)</b><br>5 sec. max.                            | 260              | °C   |
| <b>Washability</b>  | Fully Sealed     |      |

### SHV Reed Relay

### Handling & Assembly Instructions

- Switching inductive and/or capacitive loads creates voltage and/or current peaks, which may damage the relay. Protective circuits need to be used.
- External magnetic fields need to be taken into consideration, including a too high assembly density. This may influence the relays' electrical characteristics.
- Mechanical shock impacts, e.g. dropping the relays, may cause immediate or post-installation failure.

### Life Test Data

\*Load increase reduces life expectancy of Reed Switches

### Glossary Contact Form

|               |  |   |
|---------------|--|---|
| <b>Form A</b> | NO = Normally Open Contacts<br>SPST = Single Pole Single Throw   |  |
| <b>Form B</b> | NC = Normally Closed Contacts<br>SPST = Single Pole Single Throw |  |
| <b>Form C</b> | Changeover<br>SPDT = Single Pole Double Throw                    |  |

Pin Out

2.54mm [0.10"] pitch grid
